*Compatible with class 320

KILOG

Configuration / Processing

Data processing

The comprehensive Kilolog data processing software helps configure, download and process data from your Kistocks.

- Data printing and export
- Graphic tools
- Calculated channels
- Management of Customers & Operators

**Compatible with
all classes**

**Customised
report**

Configuration

3-stage configuration of:

- Your device
- Your channels
- Your thresholds and alarms
- Your recording

Downloading

In 1 click, quickly download data from the KISTOCK or station.

- Automatic backup
- Campaign archiving

Processing

- Creation of tables and graphics
- Automatic calculations
- Addition of advanced calculation features
- Data export to a spreadsheet

KILOG CFR: Data security

The KILOG CFR software is the indispensable user application, with traceability subject to the strict requirements of the 21 CFR part11 regulation. The security and integrity of your data are protected against any manipulation or falsification.

Benefits

of the KISTOCK range

Energy performance

Temperature

Atmospheric pressure
hPa

With the new range of Kistock stand-alone dataloggers and KILOG software, you can collect and analyse all the metrics of industrial climate control engineering processes, monitor the climatic environment of a chamber and respond to the traceability requirements of agri-food and pharmaceutical industries during transport

To respond to this broad application scope, the range comes in 4 device classes, from the most compact to the most advanced, the objective being to provide a specific, reliable and effective solution to the constraints of every business.

Smart Plug technology

In addition to the measuring element, the new measuring sensors for class 320 (see page 14) are equipped with an electronic card so they can be identified by the datalogger as soon as they are connected, with no need for prior intervention or configuration.

This card also includes calibration data, which avoids having to return your entire configuration (sensor + logger) to the KIMO laboratories for recalibration or sensor replacement: your process remains under 24/7 surveillance.

Interface USB

The new class 120 Kistock devices provide data logging, on-board configuration and measurement reports.

Equipped with a USB connector, these portable dataloggers are quickly connected to a computer to directly download the data and publish it in a graphic report in PDF format. The integrated interface, exclusively available in this class, also enables the rapid and simple configuration of your devices.

Mobile application

Available for iOS or Android smartphones and tablets, the mobile Kistock helps configure, generate the measurement report and visualise data from the logger in real time (class 320 only, see page 14).

With a range of 10m via Bluetooth Low Energy connection, access to data is facilitated and avoids any breakdown in process control.

Integrated USB
connector

The stakeholders of the different food chains must comply with the manufacturing, storage, transport and distribution temperatures determined by regulations or, in the absence of any regulation, with those determined by the packager, under their responsibility, specified during production, storage, transport and distribution. The use-by date of a product, determined by the manufacturer, takes these temperatures into account.

FIELD

Class 220

Temperature / Humidity / Water pressure / Light / Pulse
Current / Voltage

2m long cable

The versatility of class 220 comes from the extension of the measurement parameters offering a broad range of applications. Thanks to the additional input for the connection of interchangeable sensors, the devices can simultaneously record up to 5 measuring channels.

Functional and adapted to the assessment of goods control and operating systems in warehouses, the range is easily mounted onto a wall and secured with a padlock or directly magnetically attached onto rack frames and other metal storage mounts. Once in place, the dataloggers can monitor the process for 4 years* without interruption or a battery change.

EXPERT

Class 320

Temperature / Humidity / Pressure / Atmospheric pressure
Air quality / Current / Voltage / Pulse

Kimo has developed a new range of dataloggers specifically adapted to the needs of the industry and laboratories. Class 320 stands out with its connected object. Two features make your life easier: the smart-plug technology of the sensors and the mobile application (see p.4).

The multi-parameter class 320 seamlessly fits into any process which requires the collection of several types of data on the same device. For example, the KCC 320 can record up to 4 parameters simultaneously: temperature, moisture level, CO₂ level and atmospheric pressure.

Made to last, class 320 has a battery life of up to 7 years and has a memory of 2,000,000 points.

**SMART
PLUG**
100 %
SMART
TECHNOLOGY

All sensors for the KISTOCK KT 320 devices are equipped with the SMART PLUG technology. Automatic recognition and storage of adjustment parameters means that they are 100% interchangeable.

KISTOCK RF

Radio dataloggers

Temperature / Humidity / Pressure / Current / Voltage / Pulse

The advantage of the range of wireless data loggers is the remote and real-time control of your process or storage area and guaranteed traceability via the KILOG RF software

Capable of storing 12,000 to 20,000 temperature, humidity, pressure, current, voltage and pulse measurement points, the KISTOCK-RF devices guarantee precise monitoring of the process for the users, over a predefined or continuous period.

Supplied as a standard feature, the KILOG-RF software facilitates the configuration of the data loggers (thresholds, alarms, smoothing, interval, periodicity, etc.) and the processing of the data collected in graphic or table mode

Monitoring your process

1

Communication base

BK-RF

Communicate with your KISTOCK dataloggers over the airwaves

2

Temperature datalogger

KH 210-RF

Control the temperature and humidity of your storage areas

3

Range extender

KPR / KPE

Extend the scope of your network with radio and Ethernet extenders

4

Alarm module with relay

Be alerted every time a threshold is exceeded

Example of application in a restaurant

Network
up to 100 devices

Battery life
up to 3 years

Metrology & Laboratories

Verify / Adjust / Calibrate

Metrology

- For 100% reliable measurements
- All brands of instruments

For measurement instruments, calibration is a way to verify that the device is working correctly. To do this, standards are used and checked against national standards via COFRAC calibration certificates.

After every calibration service, you will be given a KIMO calibration certificate ensuring that our standards are checked against the national standards of accredited bodies such as COFRAC in France or DKD in Germany.

Calibration/Adjustment
of measuring instruments

Hotline
Attentive to your needs

Before returning any equipment, our telephone technical support service helps you save time by giving you a rapid and effective solution (start-up, installation, malfunction).

Our experienced technicians will deal with your request in a professional manner.

Thermometry laboratory

KIMO proposes COFRAC calibrations for all types of thermometer (chain, Pt100 and thermocouple), within a range of -70°C to +200°C in ovens or baths.

Hygrometry laboratory

KIMO proposes COFRAC calibrations for all types of moisture meters within a range of 5% to 95%RH for a dry-bulb temperature of +10°C to +50°C.

KISTOCK APPLICATION EXAMPLE: TEMPERATURE MAPPING

Warehouse / Laboratory Pharmacy / Chamber / Transport

The **NF EN 60068-3 standard*** ensure the sustainability of products sensitive to temperature and relative humidity.

Pharmaceutical
warehouse

Climatic conditions
 $20^{\circ} \pm 5^{\circ}\text{C}$

100,000 m³
characterisation volume

*NF EN 60068-3 standard

- Measurement of the temperature and relative humidity of the air
- Climatic and thermostatic chambers
- Characterisation and deviation from target

Equipment

26 KT 320 data loggers (see page 16), including 1 installed outside. KILOG software to configure and process data.

Mission

Mapping a drug warehouse in accordance with the **NF EN 60068-3** standard under temperature and relative humidity conditions of $20^{\circ} \pm 5^{\circ}\text{C}$

Report

A report should be issued featuring the gross values, calculated parameters (deviation from target, stability, homogeneity) and compliance of the chamber or building with the specified tolerances.
